**20. CAXTON, William. CHRISTINE DE PISAN.** *The Boke of the Fayt of Armes and of Chyalrye. [The Book of the Feat of Arms and of Chivalry].* Westminster: William Caxton, July 14, 1489.

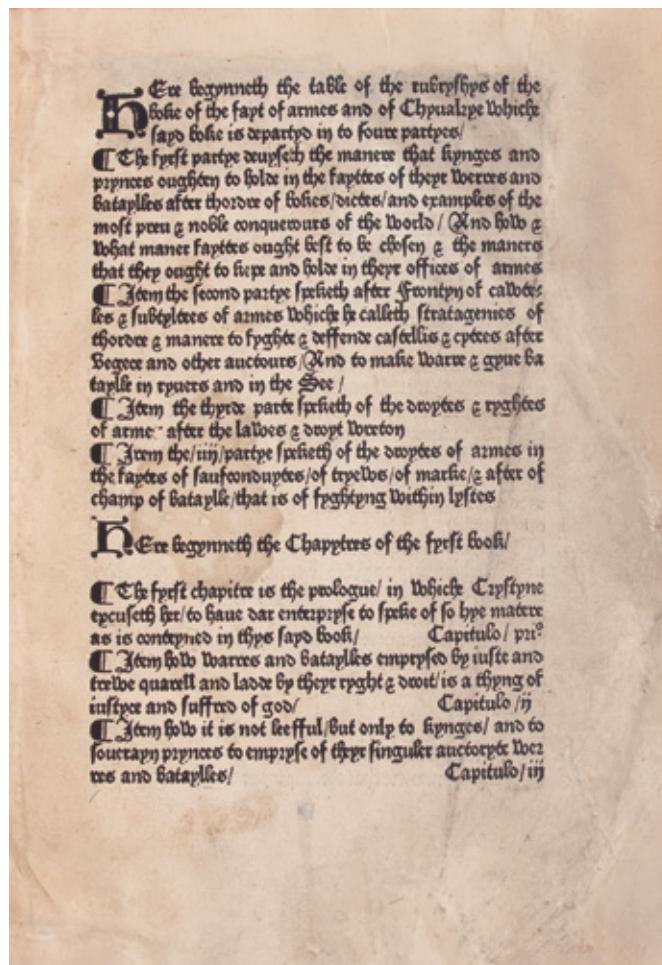

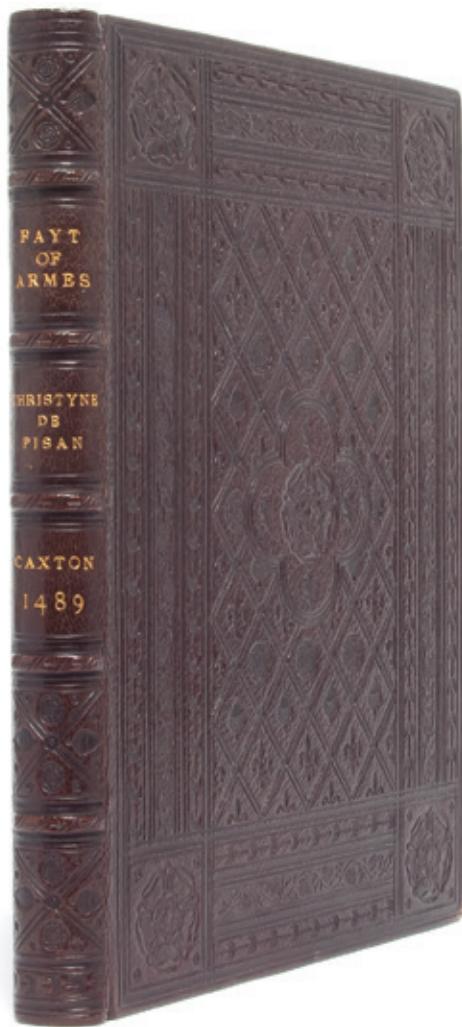

First English language edition. Chancery folio in eights (10 1/8 x 7 1/4 inches; 258 x 185 mm). 139 of 144 leaves. [2], 137, [4, facsimile] leaves. [\*2], A-R8, S1, S 2-5 facsimile. Lacking leaves S2-S6 but supplied in manuscript facsimile. 31 lines printed in Caxton's type 6. Woodcut initials. One of only two copies to appear in the modern auction record; this copy number 39, entry 28 of the Caxton Census (De Ricci): belonging to Bryan Fairfax then Francis Child before going to the Earl of Jersey, later sold to Ellis in 1885. In all, an incredible surviving work by England's inaugural printer; the present being Caxton's first full-length book in English by the first Western feminist writer.

Bound by Bedford in intricately blind-stamped with the motif of Tudor rose in period style full brown Morocco. Spine lettered in gilt. All edges brightly gilt. Bookplate of Victor Albert George Child Villiers, Earl of Jersey, Osterley Park (1845-1915) to the front pastedown. Manuscript note in 18th century hand affixed to front endpaper with a brief biography of de Pisan and an account of Caxton's printing commission from the king. Preliminary two leaves (\*1-2, table) with repairs along all margins, just occasionally touching text. Second preliminary leaf with a 4-inch repaired closed tear to bottom margin, just barely affecting text. Top outer corner repairs to leaves A-A7. Some small worm holes, mainly just through signature H, touching text but nearly invisible. Occasional faint marginalia in a 17th century hand. Several small worm pinholes throughout not affecting legibility.

Christine de Pisan, resident poet and historiographer at the French court of King Charles VI, was the first feminist author in the West. After introducing the printing press to Britain in 1471, William Caxton became the nation's inaugural and most influential printer. Together, with the 1489 publication of The Feat of Arms and of Chivalry, these two figures made book history. De Ricci. ESTC S106571.

This copy has the original genuine blank at a4 and has a correction which does not appear to have been noticed by any of the bibliographers. On p. 94, the bottom line of text is covered by a paste-over slip. This line properly belongs at the bottom of p. 98 and presumably it was decided that a paste-over was easier than a cancel. (Kraus) The fourth of the seven texts in this collection is a reprint of Columbus's letter to Rafael Sanchez in Cosco's Latin translation (pp. 116-121). "This is the edition from which most early writers quote" (Church). It is the earliest printing in the sixteenth-century of Columbus's first letter and the earliest printing that could be bought at a reasonable price. Palau 271044. Sabin 72023. Harris 175. It was originally planned to print 500 copies of this first edition, but after 26 sheets were completed, it was decided to increase the number to 1000. The type of the earlier sheets had by that time been distributed, so when they were set up again, the opportunity was taken to correct the numerous errata and to print the text of the cancel leaves which, for some unknown reason, had been substituted for the original leaves. Vols. II and III were published together in 1781." In Volume III, p. 177 is correctly numbered, and "Honorous" is left uncorrected on p. 179, line 18. G1 and L1 cancels in volume 2 (signed G\* and \*L1), H3 and L2 cancels in volume 4 (the latter signed \*L2). The engraved portrait of Gibbon was issued separately in 1780.

This is also the second edition overall (preceding other American editions besides the first, and any London editions). Two octavo volumes (7 9/16 x 4 7/8 inches; 192 x 123 mm). [5], xxii-lii, [1]-366 pp.; [4], [1]-511, [1, blank] pp. The preliminary pages contain the Constitution.

Green silk page-markers in each volume. Boards a bit rubbed and corners bumped. Two small worm holes to front joint of volume II. Overall a very good, internally clean copy.

"Both issues of the first French edition are of the utmost rarity. I have heard of but one example of the first issue, the imperfect copy in the library of Harvard College, referred to by Mr. Dawson. The second is almost equally rare. There is one copy in the New York State Library (mentioned by Mr. Dawson), another in the library of Yale College, and a third was sold at auction not long since." Mr. Lodge's *Introduction to the Federalist*. The two issues "are identical as to matter and composition, with the exception of the introduction, which is omitted in the second. Translated by Trudaine de la Sabliere, who added an Introduction, and Notes, most of which are merely explanatory of such parts of the text as would be unintelligible to the French reader" (Bibliotheca Hamiltoniana: A List of Books Written By, Or Relating to Alexander Hamilton. ### Rare First Edition of Harrison's Protest Regarding His H4 Timekeeper and the Longitude Award

61. **Harrison, John.** *A Narrative of the Proceedings Relative to the Discovery of the Longitude at Sea*; by Mr. John Harrison's Time-Keeper; Subsequent to Those published in the Year 1763. London. Printed for the author, and sold by Mr. Sandby, 1765.

First edition. Small octavo ( $6\frac{7}{8} \times 4\frac{9}{16}$  inches; 175 x 115 mm). [2], 18 pp. Bound without half-title and final blank. Engraved initial and headpiece on page [1]. We could only find four copies of this at auction in the past 40 years, present copy included. Of these four copies, only one was complete with both the half-title and final blank.

Pamphlet bound in half brown morocco over brown library cloth. Spine lettered in gilt. Drab dark blue endpapers. Title-page lightly soiled, otherwise internally very clean. Small stamp of The Birmingham Assay Office Library on newer front free endpaper leaf and on verso of title-page. Overall a very good copy. Housed in a custom full morocco clamshell.

"The second sea trial of Harrison's fourth time-keeper, H4, was made aboard the *Tartar* on a voyage from Portsmouth to Barbados in 1764. Harrison's son accompanied the voyage and made further refinements to the watch and when it arrived at Barbados the error of the watch was found to be only 43 seconds. Upon returning to England, the Board of Longitude refused to grant the longitude award to Harrison in full, causing him to publish defenses of his watch and its precision. The present work copies letters of the Admiralty sent to Harrison in the preceding years establishing his development of the watch, and concludes with his own memorial. In it he outlines his claim, concluding in part that 'whereas a method (invented by your Memorialist) for the Discovery of the Longitude hath been tried by Experiments made according to the Appointment of your Honourable Board... Your Memorialist therefore humbly prays; that your Honourable Board will be pleased to grant him such Certificate as directed by the above recited Act.' The Board held firm for more than nine years, however. It was not until the intervention of Parliament in 1774 that Harrison received the balance of his reward of £20,000 to which, under the Act of 1714, he was entitled...The National Maritime Museum did not have a copy of the pamphlet until 2003, when it acquired the papers of the 2nd Viscount Barrington, a member of the 18th-century Board of Longitude. The self-published pamphlet was presumably printed in an extremely limited edition for private circulation to members of the board." (Frank S. ## Earliest Found and Earliest Attainable Pamphlet by Sea Captain Elijah Holcomb

Disbound, but leaves held together. Some minor foxing, otherwise very good.

The author Captain Elijah Holcomb writes, "The primary object of my undertaking this laborious task, is to ameliorate the distress of a class of our citizens that has been neglected, and, as it were, trodden under foot, because they were sailors." This pamphlet is "a narrative [sic] of some of the most striking events of a seafaring[sic] life."
